

LUNDS
UNIVERSITET

Lund, 220131

To whom it may concern,

I hereby confirm that Mr Joseph Binns has been working as a Study Support Mentor, beside his own studies, for the Disability Support Services at Lund university, since January 2021.

By working as a mentor/tutor for students with challenges in the study situation, he has contributed to facilitate the study situation and create positive new routines for fellow students. During this year, he has made a significant difference in the life of two students with disabilities, studying at the Faculty of Science.

Joseph Binns is a highly appreciated mentor, both by the students and by us as employers at the Disability Support Services. He is a very dedicated, sympathetic and competent person and we highly recommend him to other positions at the university.

We wish Mr Binns the best of luck,

LUND UNIVERSITY

LUND
UNIVERSITY

January 28, 2022

Dr. Alice Ohlson
Division of Particle Physics
Department of Physics

To whom it may concern:

I am writing in strong support of the application of Joe Binns to the MSc program in machine learning at KTH. I am an assistant professor (biträdande universitetslektor) in experimental particle physics at Lund University and a member of the ALICE Collaboration at CERN, the European Organization for Nuclear Research.

During the Fall/Winter 2021 semester, Joe was one of the top students in my class, *FYSC24: Particle Physics, Cosmology, and Accelerators*. His classwork was consistently of high quality, and he was awarded a very good score on the final oral exam. His high grades reflected his firm grasp of the concepts we taught in the course and the underlying connections between them, as well as his strong work ethic. His success in my class demonstrated his strong logical and analytical skills, which I understand come from his experience and interests in computing.

Joe is strongly self-motivated and driven to pursue his passion for computing, particularly machine learning. The MSc program at KTH would be an ideal place for him to continue to develop his talents and realize his potential to become an excellent computer scientist. Therefore I recommend Joe very highly and without reservation to this program.

If you need any additional information, please do not hesitate to contact me.

Sincerely,

To whomsoever it may concern,

I have worked with Joe Binns over the summer of 2019, when Joe did a 3 month internship at our company.

During this time Joe showed great ability to solve problems, he took initiative and came up with creative new designs in his work and research with Unity and real-world simulations of pedestrian flows. Joe made significant contributions during his internship as part of a small team. This was all the more impressive given that he was the youngest intern at the company and still finishing up high school.

I have thoroughly enjoyed working with Joe, and he comes with my highest recommendations. Should you have any further questions, please feel free to email me at mark@mlabs.city.

Sincerely yours,

Mark Florisson CEO at
